This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

The aim of this finding-list is to represent all the material in the library, classified on the shelves under any section of the general subject *music*. A search through the card catalogue would naturally discover many titles for material dealing in part with musical topics (including sketches of minor composers and musical artists), but the inclusion of these would swell the publication unduly. Some entries have been inserted more than once, but the number of these would hardly equal fifty. An outline of the main divisions of the classification, which is based on the Dewey system, is as follows:

Bibliography,	Cantatas (secular),
General works,	Sacred music,
Aesthetics,	Vocal music (secular),
Compends,	Voice training,
Dictionaries,	Orchestra,
Addresses, essays, etc.,	Piano,
Periodicals,	Organ,
Societies,	Violin,
Education,	Other instruments,
History,	Anecdotes,
Theory,	Children's books,
Opera,	Biography.

The only attempt at evaluation has been made to mark with a † all books included in the "A. L. A. catalog, 1904." Books thus marked are recommended by a committee of experts from the American library association as desirable in a general collection of 8000 volumes. The best annotated bibliographical guide known to the compiler is that of H. E. Krehbiel, referred to on p. 6. Notes and *contents* have been given when necessary. In the case of *scores* the exact character of the publication has been stated, *i. e.*, whether libretto, piano or vocal score, and the language (one or more) of the words. The terms *songs, hymns, lyrics*, etc., are understood to mean *with the music*, unless otherwise stated.

In biography the material has been limited to composers included in the "A. L. A. catalog." This restriction is arbitrary, but the list still includes all the material in the card catalogue relating to the best known composers, and occupies, as it is, about one-fourth of the whole pamphlet.

The index contains all the names of writers and composers represented, as well as of many translators and editors, and also titles of operas and oratorios, subjects and form divisions.

Thanks are due to Mr. Charles I. Rice for much time and pains spent in making recommendations for the purchase of musical scores: these have been included in the supplement.

Finding-List of Music
